

Comeback

Ella Eyre

1. Caught out, sleeping around

He says it's nothing with her lipstick on his mouth
And you might think he doesn't care that much at all
But they always come back, yeah they always come back

2. When he returns he puts you in a situation

But it's too late to have that kinda conversation
It's not your job to show this boy some education, no
Now ain't it funny how we never seem to work it out

R: We've all been played, we all get hurt

Just take that pain and let that motherfucker burn
And you know that in time you will find
That they always come back, yeah they always come back
They're all the same, they never learn
So dig their grave, and let that motherfucker burn
And you know that in time you will find
That they always come back, yeah they always come back

3. Dry your eyes Mr. Wise Guy

But take a picture, it's the last that you will see
Let's see how far this guy gets walking on his own feet
But they always come back, yeah they always come back

4. When he returns he puts you in a situation

But it's too late to have that kinda conversation
It's not your job to show this boy some education, no
Now ain't it funny how we never seem to work it out

R: We've all been played...

We've all been played, we all get hurt
Just take that pain and let that motherfucker burn
And you know that in time you will find
That they always come back, yeah they always come back

R: We've all been played...
