

# Stay Awake

Ellie Goulding

Take my faith in your hands, we've got a lot that hasn't near begun  
Something is calling us, we're breaking free,  
I'm curious, I need to see.

Like a flash before our eyes, rolling to the night,  
And if it feels like you're dreaming,  
Believe it, believe it.

We'll have to wait to the morning,  
The sun will never go down.  
And we'll be this way forever,  
I guarantee you that.  
Just stay awake, stay awake,  
You can feel it just the way it goes  
Just stay awake, stay awake.

Bring me down, side by side,  
While our reflections pick up all this collide.  
So full of energy, nothing to hide,  
No need to sleep, we come alive,

And if we're gonna take this right,  
We can go wherever we like  
And if it feels like you're dreaming,  
Believe it, believe it.

We'll have to wait to the morning,  
The sun will never go down.  
And we'll be this way forever,  
I guarantee you that.  
Just stay awake, stay awake,  
You can feel it just the way it goes  
Just stay awake, stay awake.

Believe it.

Take my faith in your hands, we've got a lot that hasn't near begun  
Something is calling us, we're breaking free,  
I'm curious, I need to see.

Our dreams was lower than this  
I flash before our dreams.

Like a flash before our eyes, running through the night  
And if it feels like you're dreaming,  
Believe it, believe it.

We'll have to wait to the morning,  
The sun will never go down.  
And we'll be this way forever,  
I guarantee you that.  
Just stay awake, stay awake,  
You can feel it just the way it goes  
Just stay awake, stay awake.
