

Night Song

Ellie Holcomb

Morning feels so far away, questions keeping me awake
Will you sing, sing your night song?
All these lies that are owning me, all this fear makes it hard
to breathe
Will you be, be my night song?

The truth that sings into my darkness
The melody of love that leads me on
The voice that comforts all my sadness
Oh, even when the suffering is long, be my night song

Unmet longings steal my mind, calm my heart with your lullaby
Will you sing, sing your night song?
The sound of love surrounding me, promise that you will never l
eave
How I need, I need your night song

The truth that sings into my darkness
The melody of love that leads me on
The voice that comforts all my sadness
Oh, even when the suffering is long, be my night song

Be my night song, oh, be my night song, oh
Be my night song, oh,
Be my night song, oh, be my night song, oh,
Be my night song, oh, be my night song

The truth that sings into my darkness
The melody of love that leads me on
The voice that comforts all my sadness
Oh, even when the suffering is long, be my night song
