

As Arson

Elliott

Burns will last like time elapse
As you wear your strings wired of collapse
Coiled so tight I swear your arms looks like wings
Loosen lines that will make the time flow like veins
Running through this life
Just look back to the restless day that yawn like weeks
This is your resolution to set everything a light
This is your conformation to make everything alright
Feel electric to harsh to fuel all these burning lights
We'll make everything alright
This is your resolution to set everything on fire
We'll make everything alright
This is your resolution to set everything a light
This is your conformation to make everything alright
Feel this tension's high keep me on the line till the effects start wearing off
We supply suspicion you imply intention keep it simple
I hear a signal coming over us
(The air)
They're sent through this station to transmit relations
Message sent back is never intact it keeps avoiding us
They tempt by distraction we send no reaction keep it simple
I hear a signal coming over us
(The air)
We keep regulations on our medication we keep coughing it all in
We live deconstructive just to reconstruct it we keep building it on in
Fear this calm well settle feel it last forever
