

Look Like You Love It

Elliphant

Bring it up, me can't hear it
A call full of ... full of blasta, we gon' share it
Run for life, you can't solve this
Look at us, suck it then you touch, you can't touch this
I see you, can you handle it
Take my mind, that's a ride and look like you love it

Look like you love it, come and look like you love it
Look like you love it, come and look like you love it
Use that mind give your tears a chance
Just for a moment make them important

My.., spread your Zen
You wake up every morning in the fat man's bed
You 'bout too little, this planet small
We are forever, you make the call
"I don't understand, " said, "I don't understand" (2x)
You better shut your mother body [?]
They got the answer, they got their roots
We both got the gun though, and we both fools (3x)
They got the answer, they got their roots
Look like you love it, come and look like you love it

Look like you love it, come and look like you love it
Look like you love it, come and look like you love it
Use that mind give your tears a chance
Just for a moment make them important

Look like you love it, come and look like you love it
Look like you love it, come and look like you love it
Use that mind give your tears a chance
Just for a moment make them important

Times in, this shit's spicy
Come smoke them [?], maybe you can try
Harder, we run the city
It looks just like fucking from the city in my sin
You down for Elli, you down for BAS
You don't even know I'm gonna fuck you pretty yard
Hey, listen up with the Elliphant
Love for run, and look like you love it

Look like you love it, come and look like you love it
Look like you love it, come and look like you love it
Use that mind give your tears a chance
Just for a moment make them important

Look like you love it, come and look like you love it
Look like you love it, come and look like you love it
Use that mind give your tears a chance
Just for a moment make them important

Huh, look like you love it
Like you love it come and like you love it (8x)
