

Thing Called Life

Elliphant

It's not hard to see
What time done to you
It's okay to me
What time make you do

It's about the time
And how it's passing by
Not more than just a moment
Fading into the blue

We are the kings and queens and criminal stars
And we got massive castles and holes in our hearts
And we not evil but not good at all
So don't feel bad it's just a thing called life

Can you come alone
I'm not ashamed
Who know right from wrong
Not me not you or them

Flicker like the light
It's all dazzling mind
Why these days and nights
Come and move on

We are the kings and queens and criminal stars
And we got massive castles and holes in our hearts
And we not evil but not good at all
So don't feel bad it's just a thing called life

We are the kings and queens and criminal stars
And we got massive castles and holes in our hearts
And we not evil but not good at all
So don't feel bad it's just a thing called life

It's just a thing called life
So don't feel bad
It's just a thing called

Life, life, life, life, life, life
