Where are my arms
I'm missing you, can see through you
I'm missing pain and movement

Where is the sun I dwell in you, know you're true My flesh dissolves in movement

I'm gliding into light and knowledge Across an everlasting pasture

Réveil mon soleil I dwell in you, know you're true My body is your movement

A cause du soleil We're living here, we suffer dear Let's start new life today

We're gliding into light and knowledge Across an everlasting pasture

Into the everlasting future
Future
Future
Future
Future
