

# A Good Heart

Elton John

Don't shy away from coming in  
Closer still my darling friend  
Don't slip, don't trip on life  
I bear the moon  
Inside your eyes  
Don't be afraid of all my years  
What you see or what you hear  
It's all yours and yours and yours alone  
Yours for the taking, so take it home

Oh it's a good heart  
To be a part of  
Just a soul full all men tend to love  
The kind of love you never knew  
Oh it's a good heart from me to you

Oh sure it's cracked a time or two  
But him and me, we pulled on through  
I've seen 'em come, I've seen 'em go  
Some went through fast  
Some went real slow  
So take a chance, and take your time  
Reading my face between the lines  
I love real good, and I love you  
My heart and me  
That's what we do

Oh it's a good heart  
To be a part of  
Just a soul full all men tend to love  
The kind of love you never knew  
Oh it's a good heart from me to you

Oh it's a good heart  
To be a part of  
Just a soul full all men tend to love  
The kind of love you never knew  
Oh it's a good heart from me to you
