## **Nice And Slow**

## **Elton John**

We can spend the night right So honey turn out the lights and do it nice and slow Do it nice and slow

You can work on a charm And tell the man in your arms To do it nice and slow Do it nice and slow

Lying here in a way that I have always wanted Close to you in a scene that I have always haunted Time and time again we defended a right to cling to Our love-shy goodbyes, for broken hearts could cry

You can do it, you can do it slow You can do it slow, slow, slow You can do it slow, slow Do it nice and slow

You can turn on the heat To keep a man on the streets When you do it nice and slow I like it when you do it nice and slow

You can work on a spell And weave your magic so well When you do it nice and slow come on and do it nice and slow

You can do it, you can do it I know You can do it nice and slow You can do it, you can do it You can do it nice and slow, slow I like it when you do it slow, slow

Come on and do it Do it nice and slow
