

# Crawling To The USA

Elvis Costello

I thought I would go to the sea and shrink down very tiny  
And slide inside the telephone wire that runs under the briny  
Till I found there is a way of crawling to the U.S.A.

You had better not go too far  
There's one way out, there's only one way  
Leave your mother and your father  
Crawling to the U.S.A.

Saw it late one night on a secret channel  
It's farther on along the tunnel  
It's way beyond the final station  
That's the one they never mention

You had better not go too far  
There's one way out, there's only one way  
Leave your mother and your father  
Crawling to the U.S.A.

You don't have to pay them that much  
You had better bring your lunch  
It's undercover, around the houses  
Up your skirt and down your trousers

You had better not go too far  
There's one way out, there's only one way  
Leave your mother and your father  
Crawling to the U.S.A.

She said, "I catch you taking liberties and they do not impress  
me  
Attach me to your credit card and then you can undress me  
Everybody is on their knees except the Russians and the Chinese

You had better not go too far  
There's one way out, there's only one way  
Leave your mother and your father  
Crawling to the U.S.A.
