Love Me Tonight

May this tenderness cling When the fire of Spring Is a memory May you still be my own When a hundred years have flown

But if it can't be Give this moment to me While our dream is bright Put your sweet arms around me And love me tonight Love me tonight Let me feel your lips on mine

And though I pray Forever and a day I'll be Possessing you I'll confess to you

If I knew that our love would be gone With the stars in the dawn's grey light I'd still hold you close and whisper Love me tonight

Elvis Presley
