

Walk Away

Elysion

Hold your breath until you blow
Don't breathe in because they will know
Just where you've been
And where you're going
Their inspiration, stop ignoring

Why are you hiding from their sight?
There is no winner in this fight
They've been haunting all your life
There's no need running through the night
Stand up, wipe away your tears
You've been against the tide for years
Don't surrender to this fray
Just walk away

Now they think you're not that strong
Your doors keep shut and prove them wrong
Your soul they want
To keep it bottled
And throw it in the dark sea's bottom

Why are you hiding from their sight?
There is no winner in this fight
They've been haunting all your life
There's no need running through the night
Stand up, wipe away your tears
You've been against the tide for years
Don't surrender to this fray
Just walk away

Just walk away

Why are you hiding from their sight?
There is no winner in this fight
They've been haunting all your life
There's no need running through the night
Stand up, wipe away your tears
You've been against the tide for years
Don't surrender to this fray
Just walk away

Just walk away (4x)
