

## Hey, What You Trying to Say

Embrace

Hey, what you trying to say  
Because the giants that I've left behind  
Won't overshadow me  
So hey, what you trying to mend  
When the magic of the first is feeling  
Like it could never end

And stars remind you  
You see the best in the dark  
And every time I see your eyes  
You can't deny it cause they say  
What you're trying to say

So hey, what you trying to lose  
What you can't describe you try to hide  
No one ever tells the truth  
So hey, what you trying to say  
Do you ask you if you need me  
As you say it's all okay

Stars remind you  
You see the best in the dark  
And every time I see your eyes  
You can't hide

Cause I know how you feel  
And every time you use that mouth  
Everything I hear will always let me down  
Cause all I hear is words  
Every time you make a sound  
Promises and worse  
You'll always let me down

Hey, what you trying to say  
Because the giants that I've left behind  
Won't overshadow me  
Hey, what you trying to mend  
When the magic of the first time is the feeling  
All these feelings never end
