

Perfect Way

Embrace

What is there left for me
What is there left to feel
In this light you'd never get no sleep
We're stuck like steel

Hey look you fool
More than you gave
You're with the only one who stays

Nowhere safe
Fooling around can wait
When they find you
You'll have burned for days
You're gonna pay

Hey look you fool
Your foolish ways
Still want it all but you can't take.

Ignore me
Cos my lies won't make it right
But on a show your doing fine
With every lie I steal the time
To find the perfect way
To end it right

Don't you see
There is no perfect way
To end it right

Don't you see
