

# Refugees

Embrace

The snow on the screen we're going light speed tonight  
Like Bonnie & Clyde except we don't die tonight  
And the blister packs coats and crumpled up notes appear  
It's a break from the swill, the piss they distill around here  
A break from the swill, the piss they distill around here

Lift off of this Metropolis  
When this town comes down,  
I wish I wish  
My first degree emergency  
Is kettled by your cavalry  
I wish I wish

The cash machine queens when ambulance teams arrive  
In their skeletal jeans they take Refugees for wives  
When their collars get felt their glorified belts won't keep 'em warm  
And we'll run up the strand, your wrist in my hand  
We know we're born  
Yeah I know I'm born  
Yeah I know I'm born

Lift off of this Metropolis  
When this town comes down  
I wish I wish  
My first degree emergency  
Is kettled by your cavalry  
I wish I wish

And when all of your friends are my enemies  
Wishing me gone as I'm running away  
And my only defence is the worst of me  
Out in the open for all to survey  
When you settle for less than I promised you  
Knowing that all of our barrels are scraped  
If it seems like it's harder to say to you  
It's cause some things are just harder to say

Lift off of this Metropolis  
When this town comes down  
I wish I wish  
My first degree emergency  
Is kettled by your cavalry  
I wish I wish
