

## Satellites

Embrace

As water laps my feet  
Sharks surround me I sleep  
You smile and line up your army  
But my enemies can't get near me

Because I claimed victory  
That day now I'm calm  
I have seen in your eyes  
How much you suffer in the dark

Where shining stars light the heaven  
We satellites hope to reach  
And my black water reflects them for me

Come on let's make our move  
They won't see a thing  
That they can't see through

And shining stars light the heaven  
We satellites hope to reach  
And my black water reflects them for me for me

Where shining stars light the heaven  
We satellites can't compete  
And my black water reflects them for me

And redemption will pour  
And crashes to the floor  
And a million cold thoughts  
Won't stop you feeling warm

Because the luck that you bring  
Conquers all these things
