

# Nuclear Healing

Embryo

Twenty-first century, countdown has just begun  
I'm looking forward to nuclear holocaust

Nuclear healing, to erase all human forms  
Nuclear healing

Lords of nations will be blown up with lands and seas  
Atomic winds and radioactivity  
Will cross the mountains to destroy what men have built  
Now Earth is ready to regain supremacy

Nuclear healing, to erase all human forms  
Nuclear healing  
Nuclear healing, to erase all human forms  
Nuclear healing

A new beginning is the only thing we need  
To hope that future could us bring the hate for greed

Corruption, religions, obsessions  
Can't ease all the pain that we've got in  
Our souls, in our brains and in our veins

None of the creatures can't avoid this dying fate  
And we can't do nothing because it's too late  
I'm the witness of the end of the world  
I'm the madman that has pushed the red button

Nuclear healing, to erase all human forms  
Nuclear healing  
Nuclear healing, to erase all human forms  
Nuclear healing

Twenty-first century, countdown has just begun  
I'm looking forward to nuclear holocaust
