

Welcome to a polluting nation  
To a mindcontrol  
Where we gain our own salvation  
On another fall

Do not seek the mighty justice  
It's been gone away  
All you find's some frightened faces  
That's the world today

Don't lose your faith just believe in yourself  
New chance arrives move your way  
Forget the past a new day will last  
Your wish granted by falling stars

I am a starchild from the sky above  
I'm on my way to bring you light  
Now it's the time for regeneration  
Forever shine in your eyes

Don't you try to misconcept us  
With a bunch of lies  
All we want is a better future  
Nobody denies

Heading for the end of days  
The message has been sent  
Punishment will be objective  
No time to regret

Prepare yourself to stand at the edge of time  
Witness the new life begins  
Erase the lie, the tear from your eye  
I'll take your soul up to the sky

I am a starchild from the sky above  
I'm on my way to bring you light  
Now it's the time for regeneration  
Forever shine in your eyes
