

I See Heaven

Emerson Drive

I've waited all night for this moment
To watch the day kiss the darkness goodbye
And I barely remember falling asleep
But the minute I open my eyes
Every dream comes true
When I look at you

I see heaven, I see an angel
Lying here next to me
Bring out the best in me
Hearts entangled, wrapped in forever
This close together
Me holding you, you holding me
You opened my eyes, baby I see
Heaven

I reach up to open the window
Let the cool air dance its way through
The sun and the sky is so blindingly bright
But it doesn't compare to you
Girl, I'm lost in time
As I watch you shine

I see heaven, I see an angel
Lying here next to me
Bring out the best in me
Hearts entangled, wrapped in forever
This close together
Me holding you, you holding me

I see heaven, I see an angel
Lying here next to me
Bring out the best in me
Hearts entangled, wrapped in forever
This close together
Me holding you, you holding me
You opened my eyes, baby I see
Heaven

Waited all night for this moment
