

## It's You

EMF

I feel like a world gone crazed  
At the thought of you  
Your hot ways still chill  
I'm closing in on you  
Temptation never leaves me  
But leaves me every once and a while  
And it's you, it's you  
That leaves me dry every time

And I only need to take it so far  
Before all these tears leave their smears  
And the thoughts of you disappear

It's you, it's you  
That leaves me dry every time

Torch my soul and leave the core  
You take it all, you take it all  
And you can take this and more  
Just before you shut the door

All these tears leave their smears  
And the thoughts of you disappear

We gotta go down south  
Just about as far as you gotta go  
Across the border  
You know the way it goes
