

# The Grave

Emil Bulls

No one can clean up the mess we left  
we fucked it up

I'm scared of what this all became  
armageddon is just hours away

where has all our conscience gone  
brainwashing and fanaticism  
the age of man comes crashing down  
saber rattling and antagonism

take me to another galaxy, maybe I'll find  
some peace light years away from here  
planet earth is just not good for me,  
I'm going home  
I say goodbye to this tragedy

we remain in our wasted state of mind  
five minutes to midnight

where has all our conscience gone  
brainwashing and fanaticism  
the age of man comes crashing down  
saber rattling and antagonism

take me to another galaxy, maybe I'll find  
some peace light years away from here  
planet earth is just not good for me,  
I'm going home  
I say goodbye to this tragedy

we all reached a new level of depravity  
we remain in our wasted state of mind  
five minutes to midnight  
we're just starrng at our grave  
we're just starrng at our grave

take me to another galaxy, maybe I'll find  
some peace light years away from here  
planet earth is just not good for me,  
I'm going home  
I say goodbye to this tragedy  
I'm going home
