

## Speed of Dark

Emiliana Torrini

Somebody let me get that far  
I don't even know right now who we are  
I see you standing on the stairwell (stairwell)  
You know that I'm leaving

Oh we used to live there  
Doing it doing it every night

How did we let this get that far  
I don't even know right now who we are  
With you my heart is in a wishing well  
Promise me never break the spell

I confess, I confess  
I have been tempted, tempted  
I want it, I want it  
Dangerous

Somebody tell me how we got that far  
I don't even know right now who we are  
If you know that you're not breathing, get out  
We can always just leave here, drive off

Life is just a flicker in the universe  
Ooh under the stars, we're indestructible  
(it's just a flick in the universe.  
under the stars, we're indestructible)

Oh somebody let me drive that car  
Every ride and down the freeway to watch it all  
We'll be making love  
Together living in a free fall  
Oh won't you come with me and go far
