

# Take the Pill

Emilie Autumn

Take the pill that makes you weaker  
Take the pill that makes you sick  
Take the pill or you'll be sorry  
Take this bloody pill and make it quick

Take the pill that kills your sex drive  
Take the pill that makes you cry  
Take the pill that burns your insides  
Take the pill that makes you want to die  
Just be careful what you say...  
Today could be your day...

You no longer rule your body  
You no longer own those rights  
You will wake up when we say so  
You will sleep when we shut out the lights  
Enjoy your stay...  
'Cause you can't run away...

Get back in line, get back in line, get back in line...  
Get back in line, get back in line, get back in line...  
You'll be just fine...

Take the pill that keeps you quiet  
Take the pill that keeps you blind  
Take the pill that wipes your memory  
Take the pill that's fucking with your mind  
That's all you have to lose...  
That's funny...

Best that you're not procreating  
Best that you don't multiply  
Better still, let's sterilize you  
Take this pill, the Doctor's standing by  
Pull up your skirt...  
And yes, it's going to hurt...

Get back in line, get back in line, get back in line...  
Get back in line, get back in line, get back in line...  
You'll be just fine...

Don't you wanna be sedated  
Don't you want to ease this pain  
If the pills are not effective  
Then we will electroshock your brain  
We are not happy with your progress  
You're not yet considered "sane"  
If these pills are not effective  
We'll electroshock your brain  
Don't even think of spitting out  
We know your tricks, we're on to you  
We will check underneath your tongue  
We know exactly what you'll do  
Your accusations are a joke  
Your credibility is shot  
Just keep your eyes down and your mouth shut  
That's the only choice you've got

So you're a Doctor and I am just a crazy little girl...  
Who would you believe?  
Well he's a Doctor and you are just a crazy fucking bitch...  
Who would you believe?  
We've filled your prescription, you'll never run out again  
We've filled your prescription, the drugs are your only friend  
We've filled your prescription, you'll never run out again  
We've filled your prescription, the drugs are your only friend  
Now, take the pill, take the pill, take the pill, take the pill  
Take the pill, take the pill, take the pill, take the pill  
Take the pill, take the pill, take the pill, take the pill  
Take the pill, take the pill, take the pill, take the pill  
Take it, take it, take it, take it  
Take it, take it, take it, take it  
Swallow, swallow, swallow, swallow  
Swallow, swallow, swallow, swallow...
