

E Melody

Emily King

[Verse 1:]

All these questions running through
Where to turn what's the truth?
Even in a crowded room I find myself alone
All the pressure it's hard to see
Live on stage starring me
And my life is like a movie every day's a scene

And everything brings E Melody
Yes, everything brings E Melody

[Verse 2:]

I have my days they come and go
My ups and downs they help me grow
I'm learning how to play the game
You're as good as your word and your name
When friends come over bringing smiles
Then all this work is worth the while
When all is said the day is done
The main concern is having fun!

And everything brings E Melody
Yes, everything brings E Melody

[Bridge:]

It's so deep I get lost between the strings
And I create a world of music far as the eye can see
So true what a song can get you through
It's like a love that's new that's feeling good to you
Oh yeah!

And everything brings E Melody
Yes, everything brings E Melody

And everything brings E Melody
Yes, everything brings E Melody
