

If God Only Knew

Emmure

The day claims who I'll want One of who I wish you would be
My hands around your neck and now will force you to scream
You're the paged over bad calls made in my dreams
I won't be safe just let me be
I won't be safe just let me be

My hands have made amends
With my hands around her neck! Her neck!
With my hands around her neck! Her neck!

The trip bleeds right through me
The peril thoughts have won
And now I've seen the ending
I swear it's all the same

And she will not forget my name!
No she will not forget my name!
She will not forget my name!
She will not forget my name!

You're the paged over bad calls made in my dreams
You're the paged over bad calls made in my dreams

I won't be safe Just let me be
I won't be safe Just let me be

My hands have made amends!
But did you compel me? So rip out your heart
But did you compel me? So rip out your heart

Never wanted it to be this way...
And now I've seen the ending
I swear it's all the same
And she will not forget my name
No she will not forget my name
She will never never not
She will not forget my name
