

Solar Panels

Emmy the Great

My dear dreams of California

Solar panels cross the desert
In your dreams of California
We are driving through the desert
In your dreams of California

Japanese companies are making
Energy off the heat in California

You've been crying in your sleep
Have you lost what you have
When you're lying next to me?
I wanna take you by the hand
(Take to by the...)
Back to your dreams of California
Out in your dreams of California
Back to your dreams of California
Out in your dreams of California

Solar panels cross the desert
That begun the life in Tokyo
Somewhere on a hill in Cambria
Hope is spinning like a windmill

Japanese companies are making
Energy off the heat in California

You've been crying in your sleep
Have you lost what you have
When you're lying next to me?
I wanna take you by the hand
(Take to by the...)
Back to your dreams of California
Out in your dreams of California
Back to your dreams of California
Out in your dreams of California
