

Don't Forget About Me

Emphatic

I know time will come and try to take away these memories
But no matter how far I go I won't forget
I know I might not see some of these faces again
Why do all good things have to end?

I remember the first day when I saw your face
You kept me on track
Now we're watching the years
As they disappear, looking back

Don't forget about me, no matter what you do
Don't forget about me, I'm always here for you
Don't forget about what we had, our time here might be through
Don't forget about me and I will always remember you

Some will stay and some will go, see how the next page begins
But we'll always have this chapter, you and me
I've got my songs, there's no right or wrong, I've just got to see
Wherever you are, I hope you're listening

Don't forget about me, no matter what you do
Don't forget about me, I'm always here for you
Don't forget about what we had, our time here might be through
Don't forget about me and I will always remember you

We'll say our goodbyes, with tears in our eyes
It's okay to move on, just know I'll never let you go

I remember the first day when I saw your face
You kept me on track
Now we're watching the years
As they disappear, looking back

Don't forget about me, no matter what you do
Don't forget about me, I'm always here for you
Don't forget about what we had, our time here might be through
Don't forget about me and I will always remember you
