

Lights

Emphatic

Before the darkness falls
And the shadows take their hold
Can we forget about what's in the past?
What's out of our control
We are so afraid of losing
But we can't give up the fight
There's too much life between us
To give up and let this die

Before the lights go out
Before we close our eyes
Take a look around
At what we'd leave behind
It's not over... 'till it's over
'Till we're 6 feet underground
We still have time to turn this thing around
Before the lights go out
Before the lights go out

It's not about who's sorry
Not about who's wrong or right
There is safety in this silence
It's an easy place to hide
Has it really run its course?
I can't see that far ahead
But I will fight for you - will you fight for me?
We can see it through the end

Before the lights go out
Before we close our eyes
Take a look around
At what we'd leave behind
It's not over... 'till it's over
'Till we're 6 feet underground
We still have time to turn this thing around
Before the lights go out
Before the lights go out

I don't wanna wonder if the
Don't switch it off - Don't switch it off
I don't wanna watch this fall apart
Don't switch it off - Don't switch it off

Before the lights go out
Before we close our eyes
Take a look around
At what we'd leave behind
It's not over... 'till it's over
'Till we're 6 feet underground
We still have time to turn this thing around
Before the lights go out
Before the lights go out
Before the lights go out
Before the lights go out
