

Hold On

Empires

They're going to take your eyes away
They might try to poison my heart
We've got to make them find us in the dark

I started to love your way
In secret while the watchmen play
You've given me the greatest fate I've known

Hold on
I won't let them take you

And in the twilight of escape
Both of my arms gunnin' your waist
When what assaulted counsel were awake

I started to love your way
In secret while the watchmen played
You've given me the greatest fate I've known

Hold on
I won't let them take you
