

Walking on this lonely street
lonely just like me
I fall in memories filled with joy
filled with pain
I have heard fear and sorrow
tryin'to keep on
on that street so unsafe so insecure at all.

My hope is gone I would come back where I was before
and the day's still going on,
there's no trace of your life here.
In the night a warming soul is
tryin' to take my hand
and my heart is in her hands cryin' for love, your
love.

My hope is gone I would come back where I was before
and the day's still going on,
there's no trace of your life and I will
save all the things in my life that will remind me your
name
and give me the strenght to carry on

I will save all the things in my life that will remind
me your name
and give me the strenght to carry on.
Help me lonely star.

My hope is gone I would come back where I was before
and the day's still going on,
there's no trace of your life and I will
save all the things in my life that will remind me your
name
and give me the strenght to carry on

I will save all the things in my life that will remind
me your name
and give me the strenght to carry on.
Help me lonely star.
save all the things in my life that will remind me your
name
and give me the strenght to carry on

I will save all the things in my life that will remind
me your name.
Oh please, help me lonely star,
help me lonely star
help me lonely star.
