

Do it

Empyr

We got to get this right
We got to do it now
I've got a fire burning, burning, burning,
burning bright
You know you're hot yeah
I see you burn to
I know you got so much to give
that you keep inside

Do it, break it, take it, give it,
Do it, dream it, break it, share it,
Take it, burn it, give it, feel it

Take your clothes off
Please don't make me wait now
Give yourself to me
That's what we're made for
I'll watch your back
Could you watch mine
Anything anytime could happen now

Do it, break it, take it, give it,
Do it, dream it, break it, share it,
Take it, burn it, give it, feel it
Dream it, share it, burn it, feel it

Tell me what's in you now

Can you show me who you are
Can you open the door
Won't quit until you're mine
Now you realize

Tear your clothes off
Please don't make me wait girl
Give yourself to me
That's what we're here now
I'll scratch your back
If you touch mine
Anything anytime could happen now

Do it, break it, take it, give it,
Do it, dream it, break it, share it,
Take it, burn it, give it, feel it

Tell me what's in you now

Can you show me who you are
Can you open the door
Won't quit until you're mine
Good or bad I want you here and now
You're not alone this time
I'm on your side
Now you realize

It's some heat you want

Then it's a flame you'll get
I've got a fire burning, burning, burning,
burning bright
They say you're hot yeah
I see you burn to
I know you got so much to give
that you keep inside
