

Saviour

End of Green

You'll never return, my saviour
On every road I walk
In every way of failure
With every heart I choke
There's no place I could be
Still it's coming down
Oh, I hope I could sleep with you still around
There's no way I could be
Still it's coming down
Oh, I hope I can sleep, when you're not around
Be my saviour, in anyone I see
Burning straight down on me
In everyone I see
Be my saviour, in anyone I see
Burning straight down on me
Burning straight down on me
