## The Only One

**Enemy You** 

I'm tired I'm waiting The neon pulsating Can anybody hear me Cause this life is draining It's living And breathing Cold concrete It's seething Built on blood sweat and bone This place is defeating They've caused that bright light pound So many faces in the crowd Twin towers break the sky The concrete roads, dreams will die Tell me this is my home Come on Pick me up lets go Cause only can stop me now Your the one The only one coming to the town These buildings Are sprawling On dark roads They're crawling The sights and sounds so thrilling This city is killing They've caused that bright light pound So many faces in the crowd Twin towers break the sky The concrete roads, dream will die Tell me this is my home Come on Pick me up lets go Cause only you can stop me now Your the one the only one coming to the town Tell me this is my home Come on Pick me up lets go Cause only you can stop me now Your the one the only one coming to the town So come on to the town Come on to the town Come on to the town
