

Heart Don't Fail Me Now

Engelbert Humperdinck

Wish she could see the part of me
That hides behind the love that used to be
It got lost somehow, heart don't fail me now

Took so long for you to mend
And now I am face to face with love again
Need you to show me how, heart don't fail me now

No one ever told me there'd be someone like her
To make it all seem worth another try
This time love found me too afraid to take a chance
But too afraid to let it pass me by

I can't forget the hurt before, I'd be a fool for coming back f
or more
Except this time I feel so sure
We'll make it work somehow, heart don't fail me now
