Enter Shikari

Yes
Axiomatic subject matter
Executed with absolute lucidity

We can't keep deferring action
Only surviving by the skin of our teeth
We can't keep deferring action
Only surviving by the skin of our teeth

We're sick of the same old story
Tonight the motionless must vacate
So we can accelerate out of a stagnant society
We're sick of the same old story
Tonight the motionless must vacate
So we can accelerate out of a stagnant society

We will, we will never be sane
We will, we will never be sane
We will, we will never be sane
In an unsane system
Keep the tempo up
Keep the pressure on
Keep the tempo up
Keep the tempo up
Keep the pressure on
Keep the tempo up
Will someone take the first step
Be brave and cave in

Alright
I admit it
We are totally lost
Imagine that
And then they say

We've lost the movement
We've lost the beat
We got so tied up in making a profit
That we choked when we realized that it was at our feet
We've lost the movement
We've lost the beat
We're all made of the same dark matter
It's intrinsic that we rise to our feet
We'll start a movement
We'll start a beat
We're all made of the same dark matter
It's intrinsic that we rise to our feet

We're sick of the same old story
Tonight the motionless must vacate
So we can accelerate out of a stagnant society
We're sick of the same old story
Tonight the motionless must vacate
So we can accelerate out of a stagnant society

We will, we will never be sane
We will, we will never be sane

We will, we will never be sane
In an unsane system
Keep the tempo up
Keep the pressure on
Keep the tempo up
Keep the tempo up
Keep the pressure on
Keep the tempo up
Will someone take the first step
Be brave and cave in

We're sick of the same old story
Tonight the motionless must vacate
So we can accelerate out of a stagnant society
We're sick of the same old story
Tonight the motionless must vacate
So we can accelerate out of a stagnant society

We can't keep deferring action
Only surviving by the skin of our teeth
We can't keep deferring action
Only surviving by the skin of our teeth
