## **Internal Warfare**

Would anybody dare to know the answer? Would anybody dare to face the truth? We bide the time awaiting our answers To our kind

We're all in this apocalypse together The horror we so feared can't be undone We all remove allegiance to disaster Tragic crime

Life we used to know Ends where silence comes to us forever Night will soon bestow Justice on a day that never ends

The piercing eyes of bullets' shine run faster Than peace and understanding can conceive To use and to deceive to teach a lesson Cross the line

Life we used to know Ends where silence comes to us forever Night will soon bestow Justice on a day that never ends

I'm a true believer A soldier with a gun I shall swipe the earth clean Won't take long

Te Deplangemus - Haud Resistentes - A Te Vexati - Manebimus

I must trust my instinct And act on his behalf My ship is full with water But won't go down

Life we used to know Ends where silence comes to us forever Night will soon bestow Justice on a day that never ends

Life we used to know Ends where silence comes to us forever Night will soon bestow Justice on a day that never ends Never ends
