

# Universal Love Squad

Epica

We are the ones to change the world now  
Still in control of all machinery  
We claim the right to pull the trigger and damage your image of  
honor

Inventing  
Improving  
Creating  
Existence  
Embrace the technological remedy

Robotic legions, stand in line to carry out  
The retribution and effects of this advanced technology  
New inventions have to pay  
To fight their way  
To judgement day

We are the ones that rule the world now  
You are entrapped by blind inanity  
There is no way that you'll revoke your decision  
Now look for distraction

Inventing  
Improving  
Creating  
Existence  
Embrace the technological elegy

Robotic legions, stand in line to carry out  
The retribution and effects of this advanced technology  
New inventions have to pay  
To fight their way  
To judgement day

I am forever the snake devouring its tail  
In search of eternity

Robotic legions, stand in line to carry out  
The retribution and effects of this advanced technology  
New inventions have to pay  
To fight their way  
To judgement day
