

Equilibrium

Epidemic

My eyes are burning
I'm finding it hard to see
My throat is getting dry
It's making it hard to breathe

Don't tell me it's alright again
Too late for me to change
No one can begin to help me out
So don't even try

Of all the things to think about
My head is starting to hurt
My mind's not opening up
Why didn't I think of this first?

Of all the things to think about my head
My head is starting to hurt

Don't tell me it's alright again
Too late for me to change
No one can begin to help me out
(If you wanna help me)

Don't agree just to agree
Save that for another day
Let me figure this out on my own
You wanna help me out?

No one can help me now
Don't try to help me

If you, if you wanna help me

Don't tell me it's alright again
Too late for me to change
No one can begin to help me out
(If you wanna help me)

Don't agree just to agree
Save that for another day
Let me figure this out on my own
You wanna help me out?

No one can help me now
Don't try to help me
