

# Supernature

Erasure

Once upon a time  
Science opened up the door  
We would feed the hungry fields  
Till they couldn't eat no more  
But the potions that we made  
Touched the creatures down below  
And they grew up in a way  
That we'd never seen before

Supernature, supernature  
Supernature, supernature

They were angry with the man  
Who couldn't change their way of life  
And they take that sweet revenge  
As they trampled through the night  
For hundred miles or more  
You could hear the people cry  
But there's nothing you can do  
Even God is on their side (God is on their, God is on their, God is on their  
side)

Supernature, supernature  
Supernature, supernature

The gods will break the ice  
And throw it in the air  
The creatures will decide  
Who goes where

How can I explain  
Things are different today  
Darkness all around  
No one makes a sound  
Such a sad affair  
No one seems to care

Supernature, supernature  
Supernature, supernature

Better watch out  
There's no way to stop it now  
You can't escape  
It's too late  
Look what you've done  
There's no place that you can run  
The monsters made  
We must pay

Maybe nature has a plan  
To control the ways of man  
He must start from scratch again  
Many battles must he win  
Till he earns his place on earth  
Like the other creatures do  
Will there be a happy end  
Now that all depends on you

Supernature, supernature  
Supernature, supernature  
Supernature, supernature  
Supernature, supernature  
Supernature, supernature  
Supernature, Supernature  
Supernature, Supernature  
Supernature, Supernature
