

Official

Eric Bellinger

[Intro:]

Yea yea yea oh woh
Lookin out for you baby

[Verse 1:]

You tell him you're hangin with yo girl
But that ain't who you gonna see
And as soon as you leave him girl
You be calling me
Don't wanna say you'll leave him girl
But that ain't where you wanna be
Come and join me in my world

[Chorus:]

So you don't have to be
Flyin, cheatin, flirtin, out all night
Cryin cause you're so afraid to hurt him yea yea
I hate to be the one to say it's over
But baby you already had it over
So do us all a favor, you him and me
And let's make it official yea
Why don't we make it official? Yea
You could stay with me
Let's just do it right
I don't wanna be what you get on the side
Your body already agrees
So let's make it official

[Verse 2:]

Why you're so afraid?
Afraid of moving on
If you don't wanna let him go
You can let me know now
And I'lll give you your space
Watch the tears fall down your face
Baby, I'd do what it takes

[Chorus:]

So you don't have to be
Flyin, cheatin, flirtin, out all night
Cryin cause you're so afraid to hurt him yea yea
I hate to be the one to say it's over
But baby you already had it over
So do us all a favor, you him and me
And let's make it official yea
Why don't we make it official? Yea
You could stay with me
Let's just do it right
I don't wanna be what you get on the side
Your body already agrees
So let's make it official

[Verse 3:]

I am one of a kind
Yes, and you are all on my mind
Yes and we could be having a hell of a time
Without all the sticking around in line

Told him you was goin up to yo cousin house
Shit, more like over your future husband's house
Had to see what this all Cleveland thug about
Took that man you out, hope you happy now

Girl, let's make it official, oh yea
Why don't we make it official? Yea
You could stay with me
Let's just do it right
I don't wanna be what you get on the side
Your body already agrees
So let's make it official official official official
Official official official yea yea
Just want you to be my girl
Official official oh oh now
