I Know

Eric Benét

Some say that change won't come We'll never live as one They say it can't be done But I know better

They say there'll be more rain They say there'll be more pain But sun's gonna shine again And I know for sho'

If you really, really wanna you could touch the sky Don't let them tell you, you can't fly that high Anything you want you just go out and try 'Cause I know, I know, I know

They say the end is near And they say it's almost here But I say to have no fear I know, it's not so

Some say that love's just a myth
It's a wonderful dream but it doesn't exist
But to look at you you're such a precious gift
That I know, I know

If you really, really wanna you could touch the sky Don't let them tell you you can't fly that high Anything you want you just go out and try I know, I know

And if you really, really want it, it could be that way Don't get caught up in what them people say All your little dreams turn into bigger things I know, I know, I know, I just know that I know, oh

The seeds you sowed determine what you grow
The road you take determines where you're gonna go
And when you feel it deep inside your soul
You'll know, you'll know

That if you really, really wanna you could touch the sky Don't let them tell you you can't fly that high Anything you want you just go out and try I know, I know

That if you really, really want it, it could be that way Don't get caught up in what them people say All your little dreams turn into bigger things I know, I know, I know

For sure
I know
What I know
I know, I know
I know, I know
