

# Where Does The Love Go

Eric Benét

We could write the story of how we fell apart  
But your truth and mine ain't the same  
So I'll write the words into my heart  
For the chapter that bears your name  
How could people go from a feeling that words can't describe  
To a place of not even caring if I'm even alive

The love that we shared, did it fade into nothing  
Where does the love go  
After all the dreams that we had did it vanish completely  
Where does the love go  
Where does the love go

They say that love is a timeless energy, it never dies it just change  
s form  
But it when it changed from the shape of you and me it took the shape  
of a raging storm  
I'm not asking for second chances  
I just want you to see  
Until you take a look at yourself girl  
You could never be free

The love that we shared, did it fade into nothing  
Where does the love go  
After all the dreams that we had did it vanish completely  
Where does the love go?  
The love that we shared, did it fade into nothing  
Where does the love go  
After all the dreams that we had did it vanish completely  
Where does love go?

When it dissipates does it turn to hate  
If you see me on the street, would you talk to me  
For the sake of love, ain't worth it babe?  
How could people go from a feeling that words can't describe  
To a place of not even caring if I'm even alive

The love that we shared, did it fade into nothing  
Where does the love go  
After all the dreams that we had did it vanish completely  
Where does the love go  
The love that we shared, does it fade into nothing  
Where does the love go  
After all the dreams that we had does it vanish completely  
Where does love go  
The love that we shared  
Where does the love go  
Where does the love go
