

Alone With You

Eric Johnson

Everyday
I'm alone with you
You know that's the only way I get high
My load is light when you shine on through to me
My soul you touch by and by
So all I want is to leave you something
That you always remember your life through
My soul you touch when I'm here with you
you know that today you're gonna see
What I say is true
It's just every little thing you do
and I feel that we could touch the sky
Yes every little thing you do
and you know what I say is true
My soul you help to shine on through
what you do you do
What you do you do when you do yeah
It's just every little thing you do
And you know what I say is true
My soul you help to shine on through
Oh by and by, touch the sky, by and by
By and by, touch the sky, by and by
