

## Alone With You

Eric Johnson

Everyday  
I'm alone with you  
You know that's the only way I get high  
My load is light when you shine on through to me  
My soul you touch by and by  
So all I want is to leave you something  
That you always remember your life through  
My soul you touch when I'm here with you  
you know that today you're gonna see  
What I say is true  
It's just every little thing you do  
and I feel that we could touch the sky  
Yes every little thing you do  
and you know what I say is true  
My soul you help to shine on through  
what you do you do  
What you do you do when you do yeah  
It's just every little thing you do  
And you know what I say is true  
My soul you help to shine on through  
Oh by and by, touch the sky, by and by  
By and by, touch the sky, by and by
