

# Almost You

Ernie Halter

Went out last Friday night  
Felt like I was ready to  
Pretty pair of green eyes  
Sideways glance from across the room  
Pretty soon we were locked in conversation

I could have kissed her leaning up against the driver door  
She was almost everything that I've been looking for

She was almost you  
Almost you  
Almost someone to hold on to  
Almost you  
A love to last my whole life  
Just when I think I've found it, the perfect love, she lets me down  
The best someone else could hope to do  
Is take second place and be almost you  
You

Stumble on an old photograph  
You and me, we were holdin' hands  
We were young and so in love  
Like we couldn't get close enough  
What happened to happily ever after?

I never look at anyone the way I looked at you  
I'm tryin' hard to find somebody new

She was almost you  
Almost you  
Almost someone to hold on to  
Almost you  
A love to last my whole life  
Just when I think I've found it, the perfect love, she lets me down  
The best someone else could hope to do  
Is take second place and be almost you
