

Scientists found the cause of the world sudden dying population
of bees is related to cell phones
The bees sync cell phone signals transmitted when the phones ring
Causing them to emit heavy buzzing noises
This frequency confuses the bees, making them fly erratically
Bees use the earth's magnetic field as a compass, but their navigation is now compromised by cell phone radiation
Making it impossible for them to find their way back to the hive
It is unlikely that the world will ever, ever, ever relinquish
the convenience of cell phones
Plus how we gon' call Tyrone to help us come get our shit

Here I am, miss Badu
Not Big Sean, but I don't fuck with you
Shall I go or shall I come?
Live from Badubutron, Nubian Phenomenon
On and on and [?]
Underwater ill motherfucker from the other son
214, calling my phone
We're from Dallas, baby, freak freak zone
Freak freak zone
Freak freak zone
