

It's Just Me

Escape the Fate

I'm creeping my way out so you can see me
I'm crawling my way around 1,000 cities
You all stop and stare, I don't need your pity
I'm living my life in this hell

Now I'm crawling away cuz the stress has killed me
I feel like I fell from a 10 story building
Best run and hide before the devil starts forbidding
I'm living my life in this hell

I'm not one for the crowd to see
It's just me
It's just...

Just a little more, come on and satisfy me
Just a little more, come on and terrify me
Just a little more and I'll be done with it
Take my life and then I'll feel okay

Cut it out of my mouth
Put my tongue on a pole
I won't sing any more
I'm losing control

Cut it out of my mouth
Put my tongue on a pole
Take the air from my lungs
Take the heart from my soul

I'm not one for the crowd to see
It's just me
It's just...

Just a little more, come on and satisfy me
Just a little more, come on and terrify me
Just a little more and I'll be done with it
Take my life and then I'll feel okay

Okay
I'll feel okay
Okay

Cut it out of my mouth
Put my tongue on a pole
I won't sing any more
I'm losing control

Cut my tears of the sound
The erosion of my soul
I won't sing any more

I'm creeping my way out so you can see me
I'm crawling my way around 1,000 cities
You all stop and stare, I don't need your pity
I'm living my life in this hell

Just a little more, come on and satisfy me

Just a little more, come on and terrify me
Just a little more and I'll be done with it
Take my life and then I'll feel okay

Just a little more, come on and satisfy me
Just a little more, come on and terrify
Just a little more and I'll be done with it
Take my life and then I'll feel
Take my life and then I'll feel
Take my life and then I'll feel okay
