The Webs We Weave

Escape the Fate

So grab this statement And read between the lines I'm walking on an edge That's how I stay alive I need a fix now The pills I have to take It helps me live a lie And blinds all my mistakes

Before I die I will have seen it all The mountains I have climbed Help me enjoy the fall

Oh the webs you weave We are caught in the fame The passion's dead The life you've lead Has drown in your shame

Oh the webs I weave I am caught in this game My passions dead The life I've lead Has drowned me in vain

So paint my portrait The colors of my life And the untold stories are painted in black and white I can hear the footsteps That follow to my pulse This paranoia has haunted me like a ghost

Before I die I will have seen it all The mountains I have climbed Help me enjoy the fall

Oh the webs you weave We are caught in the fame The passion's dead The life you've lead Has drown in your shame

Oh the webs I weave I am caught in this game My passions dead The life I've lead Has drowned me in vain

I will have seen it all (seen it all) (2x)

I'm killing time Let me go (Before I die) (I will have seen it all) It reads their minds Brings them close (Before I die) (I will have seen it all)

Oh the webs you weave We are caught in the fame The passion's dead The life you've lead Has drown in your shame

Oh the webs I weave I am caught in this game My passions dead The life I've lead Has drowned me in vain
