Most people agree that evil exsists in this world, for some it's war, famine, or violence. For some it's a spiritual, and for other's, evil is a very real presence, a physical entity, of te rrifying power.

What is evil? Is it mearly a dictionary definition for wrong or bad, or is it something more, a deeper, darker force that make s people perform cruel or inhuman acts. Does an evil force real ly exsist that can attract and then control the actions of huma n beings, or is evil nothing more than a convenient excuse for deviant and destructive behavior. These are questions without e asy answer's and are continually debated by those who study the human mind and the human sprirt.
