

Every Harmony

Eskimo Joe

When I sing to myself, I hear it like it makes no sense
And we all sing along like a chorus when we take that chance
Well somewhere there you lost your mind
You hear it playing out of time

And we're searching for gold
It's easy when the light shines on
Does it all seem the same like the stars up against the sun?
Well somewhere there you lost your mind
You feel it spinning out of time

So sing it to me

Come on my love, every harmony is so cold
Now I sing it alone
Come on my love, every harmony is so cold
Am I over, over you?
All you have to do is say go and you know I'll follow you

Can you hear the bells ring louder than the angels sing?
And they all sing along like a chorus when the light comes in
Well somewhere there you lost your mind
You feel it slipping out of time

So sing it to me

Come on my love, every harmony is so cold
Now I sing it alone
Come on my love, every harmony is so cold
Am I over, over you?
You tell me that I'm moving too slow and now I sing it alone
Come on my love, every harmony is so cold
Am I over, over you?

Can you hear the bells ring louder than the angels sing?
Can you let the sound in, just enough to shed your skin?
And the silence, will it always follow you?

Come on my love, every harmony is so cold
Now I sing it alone
Come on my love, every harmony is so cold
Am I over, over you?
Am I over, over you?

And they all sing along like a chorus when the light comes in
And they all sing along like a chorus when the light comes in
Come on my love
Come on my love
